We look forward to hearing from you.

Very truly,

ARROW TRU-LINE, INC.

The History of **Arrow Tru-Line, Inc.**

1970 Arrow Tru-Line, Inc. is founded by Al Marko of Archbold, Ohio, starting in a rented 13,000 sq.ft. building in Archbold. His primary intention was to supply the housing market with roll-formed "C" section floor joists. His secondary products were roll-formed garage door tracks and struts, but these products soon became the company's primary focus.

1976 The company builds a 32,000 sq.ft. building in Archbold (its present corporate headquarter location).

1978 The business grows, requiring a 14,000 sq.ft. addition to the Archbold manufacturing facility.

1981 Another 15,000 sq.ft. addition brings total manufacturing space to 61,000 sq.ft. in Archbold.

1986 Dave Shaffer rises through the ranks to become president of ATL, replacing Al Marko.

1992 ATL opens its first West Coast distribution and manufacturing facility, 30,000 sq.ft. building in Tempe, Arizona.

1993 The firm acquires Collier Industries USA of Collier, West Virginia, a manufacturer of garage door hardware since 1955.

Responding to further growth, ATL expands to a 55,000 sq.ft. building in nearby Bryan, Ohio.

1994 Another expansion brings total manufacturing space in Archbold to 78,000 sq.ft.

1995 ATL celebrates 25 years in business.

ATL acquires APCO Power Unit of Toledo, Ohio, a maker of cable drums and spring fittings. The acquisition includes the "In Balance" computer program for selecting the right torsion spring for every door.

1996 Arrow Tru-Line, Inc. expands its product offering to include customized hardware cartons and track assemblies.

1997 More growth requires the addition of another 22,000 sq.ft. to the Archbold plant, now totaling more than 100,000 sq.ft.

1999 ATL adds 100,000 sq.ft. to its existing building in Archbold, Ohio.

The History of Arrow Tru-Line, Inc.

- 2000** Business growth forces the expansion of the Bryan plant (70,000 sq.ft.) and the addition of the Stryker, Ohio facility (91,000 sq.ft.). The new space enlarges all primary manufacturing work centers.
- 2001** ATL moves its West Coast manufacturing/distribution facility in Tempe to a larger 50,000 sq.ft. building in Las Vegas.
- 2002** Arrow Tru-Line, Inc. announces its "Lockhole Knockout" and Lockhole plastic cover, two new safety features for their 2" vertical track.
- 2003** The company announces its exclusive "Tru-Trak" system, a patented safety design, placing rolled edges on its track.
- 2004** The ATL market begins to expand overseas.

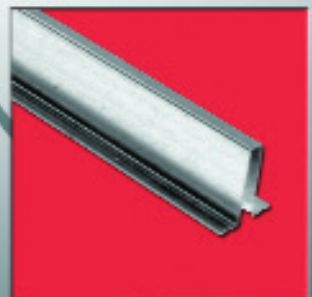

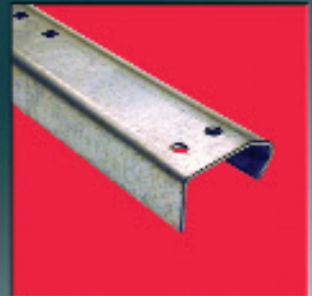

The firm acquires OMI Industries of Lewis Center, Ohio, a supplier of spring fittings, cable drums, lock parts, rollers and other miscellaneous components for sectional garage doors and openers.

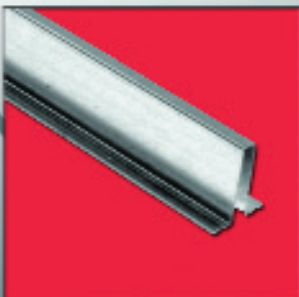

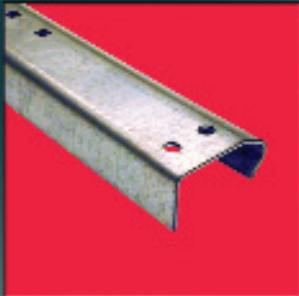

- 2005** Arrow Tru-Line, Inc. introduces "Trak-Shield", a track-mounting system that eliminates the need for an add-on safety shield.
- 2006** The company opens a 48,000 sq.ft. manufacturing and distribution facility in Dallas, Texas. The building expands to 83,000 sq.ft. in 2007.

ATL acquires Collier Industries of Brantford, Ontario, Canada, a manufacturer of garage door hardware and springs. The acquisition expands ATL's distribution in Canada.

- 2007** Further growth in the West necessitates the relocation of ATL's Las Vegas plant to a building that more than doubles its capacity. The new 118,000 sq.ft. facility is also in Las Vegas.
- 2008** ATL wins *The Industry Member Service Award* at the International Door Association Expo held in Las Vegas, Nevada. The award honors an industry member of the IDA for its continued excellence in the operation of a manufacturing facility, for significant contribution to the International Door Association, for overall industry and product innovations and for displaying exceptional traits of honesty, integrity and quality.

Dave Shaffer is appointed to Chairman of the Board of Directors, and Jason Anderson is promoted to President of Arrow Tru-Line, Inc.

Arrow Tru-Line, Inc.

What Arrow Tru-Line can do for you...

Arrow Tru-Line has a diverse manufacturing and distribution base with over 600,000 square-feet of manufacturing and warehouse space available in North America.

Domestic capabilities –

- Roll forming
- Stamping
- Light assembly
- Powder coating
- EDM machining
- CNC mills
- CMM QC Verification

Importing began over 15 years ago due to cost reduction requirements by many of our customers. With an employee staff located directly in mainland China, Arrow Tru-Line has a direct link to over 25 factories in China and Taiwan with a hands-on approach to quality and production.

International capabilities –

- Stamping
- Aluminum Die casting
- Zinc Die casting
- Keyed lock sets
- Iron casting
- Plastic injection
- Fasteners
- Cable and Chain
- Forged
- Fabrication and welding
